

SURYA PRAKASH K.S.

ENTRY-LEVEL TECHNICAL / APPLICATION SUPPORT ENGINEER

Chennai, India | +91 91503 57320 | suryakannan32123@gmail.com | Immediate Joiner

PROFESSIONAL SUMMARY

B.Tech Information Technology graduate seeking an entry-level Technical / Application Support role. Built and troubleshot Java 17 / Spring Boot applications in self-directed projects using REST APIs, MySQL, JWT authentication, automated tests and Docker. Investigated API responses, validation, authorization, persistence and integration behavior; verified changes with tests and CI. Clear technical communicator, ready to learn support procedures and work shifts. Project experience only; no professional technical-support employment claimed.

TECHNICAL SKILLS

Programming: Java 17, SQL, React

Databases: MySQL, H2, Spring Data JPA, Hibernate, relational transactions; database troubleshooting exposure through project development

APIs / Web Services: REST APIs, Spring MVC, HTTP methods and status-code fundamentals, request/response debugging, request validation, JWT, RBAC, STOMP WebSockets

Support / Troubleshooting: Application troubleshooting, API debugging, database behavior investigation, configuration and integration troubleshooting, error investigation, test-based verification

Cloud / Deployment: Docker, Docker Compose, GitHub Actions CI, Render deployment blueprint, Vercel

Development Tools: Git, GitHub, Maven, JUnit 5, Spring Boot Test, MockMvc

SELECTED TECHNICAL PROJECTS

CollabBoard | Real-Time Collaboration Platform

Java 17, Spring Boot 3.3.2, React 18, MySQL, JWT, STOMP, Docker

- Built 8 REST handler methods across 9 routes and 3 STOMP destinations for boards, membership, comments, activity, presence and synchronized card/list changes; investigated API and real-time integration behavior during development.
- Modeled collaboration data with 7 JPA entities. Used the authenticated principal as WebSocket actor identity and checked board membership before commands to prevent spoofing and cross-board mutations.
- Added 8 JUnit 5 / Spring Boot Test / MockMvc tests. Validated the React production build and Docker Compose setup through GitHub Actions; deployed a Vercel demo frontend and retained the backend/MySQL/WebSocket stack for local execution.

Nexora | E-Commerce Backend

Java 17, Spring Boot 4.0.6, React 19, MySQL, JWT, Docker

- Developed and troubleshot REST APIs for authentication, catalog, profile, checkout, orders, email, invoices and administration; implemented 27 handler methods across 28 routes with request validation and transactional Spring services.
- Structured 6 JPA/MySQL entities with controller/service/repository separation and transaction boundaries; traced application and relational-write behavior during development.
- Wrote 8 JUnit 5 tests covering JWT behavior, email builders, PDF invoice generation, profile response mapping and H2-backed startup; containerized the backend and prepared a Render deployment blueprint.
- Deployed the React frontend to Vercel for recruiter review.

EDUCATION

B.Tech, Information Technology | Panimalar Institute of Technology, Anna University, Chennai | 2019-2023 | CGPA: 7.6/10

Relevant coursework: Data Structures & Algorithms, Database Systems, Software Engineering

CAREER DEVELOPMENT

2023-2026: Prepared for competitive examinations while continuing technical development through self-directed Java / Spring Boot projects.
